---

Backend Software Developer

[Linkedin](#) • [Github](#) • [My portfolio](#) • [ojedajesus232@gmail.com](mailto:ojedajesus232@gmail.com)

## Education

### Universidad Politécnica de Quintana Roo

[January 2025 - Present]

*Engineering in information technology and digital innovation with a specialty in software development.*

### High School: Centro de Bachillerato Tecnológico, Industrial y de Servicios (CBTIS) No. 111

[August 2021 - July 2024]

*Computer Equipment Support and Maintenance Technician.*

## Experience

### Universidad de Caribe

#### Systems Support Assistant -

#### Internship

[May 2023 - April 2024]

- *Implementation of a preventive maintenance plan for computer equipment.*
- *On-site and remote technical support for users.*
- *Installation of network and telecommunications devices.*
- *Inventory control.*

### Billbud

#### Full-Stack Developer - Part Time

[August 2025 - Present]

- *Applied principles of hexagonal architecture to build maintainable and scalable backend systems.*
- *Designed and implemented notification and push notification features using Go and Flutter, integrated with Firebase Cloud Messaging (FCM).*
- *Strengthened skills in backend-mobile communication, cloud service integration, and multiplatform software development.*

## Actually Projects I have participated in

### Collaborative Project

#### Event API Service

#### Backend Developer

[October 2025 - December 2025]

*Contributing to the development of an event management platform focused on ticket processing and secure user interactions:*

- *Implemented authentication flow using JSON Web Tokens (JWT) to generate and validate tokens upon user login.*
- *Configured secure email delivery of JWTs to grant access to event-related forms.*
- *Designed and implemented backend logic to send automated emails when forms are updated, or when users request cancellations or refunds.*
- *Collaborating with the frontend team to enhance the ticket interface for a better user experience.*
- *Ensuring reliable and maintainable backend communication between the event system and email services.*
- **Tech stack:** Node.js, Express, MongoDB, moongoose, JavaScript.

### LinkedIn Collaborative Project

#### LabManager

#### Backend Developer / Teach Lead

[September 2025 - November 2025]

*Leading the backend development of a laboratory management system;*

- *Designed and implemented the authentication system using JSON Web Tokens (JWT) for secure access and session handling.*
- *Developed complete validation logic using middleware to ensure data integrity and secure API operations.*
- *In charge of the entire Patient Module, including RESTful API endpoints, services, and business logic implementation.*
- *Acting as Technical Lead, managing team coordination, reviewing code quality, defining technology stacks, and overseeing backend architecture decisions.*
- *Ensuring scalability, maintainability, and adherence to best practices in backend development.*
- **Tech stack:** Node.js, Express, Supabase(PostgreSQL), Prisma ORM, TypeScript.

## **Gym Management System – Personal Backend Project**

**[September 2025 - November 2025]**

*Developing a personal backend application to manage gym memberships, clients, and payments.*

- Designing the database schema and implementing CRUD operations.
- Integrating authentication, member registration, and payment features.

**Tech stack:** ASP NET CORE (Web API), Entity Framework, SQL Server.

## **Huesped Reservation System – Personal Backend Project**

**[November 2025 - Present]**

*Developing a personal backend application to manage resources in hotels and manage reservations for partners.*

- Designing the database schema and implementing CRUD operations.
- Integration with stripe service and redis for caching.
- Use DDD principles and modular monolithic architecture : Domain/Application/Infrastructure layers.
- Integrating authentication, member registration, and payment features.

**Tech stack:** ASP NET CORE (Web API), Entity Framework, SQL Server.

## **My Skills**

### **Technical:**

- **Frontend Development:** HTML, CSS, JavaScript, React, tailwindcss, Bootstrap.
- **Backend Development:** Node.js/Express, FastAPI, ASP.NET.
- **Databases:** SQL Server, MySQL PostgreSQL, MongoDB, redis.

### **Soft Skills:**

- *Effective Communication.*
- *Teamwork & Collaboration.*
- *Problem Solving.*
- *Adaptability.*

### **Language:**

- **Spanish:** Native.
- **English:** A2.
